PROFILE

Final-year Computer Engineering student with strong problem-solving skills (300+ LeetCode problems) and hands-on experience building scalable MERN applications featuring authentication, payment integration, and real-time booking systems. Interested in backend engineering, and full-stack development.

EDUCATION

Pimpri Chinchwad College of Engineering, Pune Jun 2023 - Jun 2027
Bachelor of Technology in Computer Engineering | CGPA: 8.11

St. Ursula High School, Nigdi, Pune Jun 2009 - Jun 2023
SSC (10th) : 93.20 HSC (12th) : 89.50

PROJECTS

QuickShow – Full Stack Movie Ticket Platform | Live Demo | GitHub
Tech Stack: React.js, Node.js, Express.js, MongoDB, Clerk, Stripe

- Built a full-stack MERN movie ticket booking platform using MVC architecture with secure authentication and role-based authorization using Clerk.
- Developed RESTful APIs and CRUD functionalities for movies, theatres, bookings, and user management, integrating Stripe for secure payment processing.
- Optimized backend performance using asynchronous programming and managed the project using Git and GitHub.

YelpCamp – Campground Discovery & Review Platform| GitHub
Tech Stack: Node.js, Express.js, MongoDB, Passport.js, Cloudinary, Mapbox

- Developed a full-stack campground discovery and review platform with secure user authentication, authorization, and complete CRUD operations.
- Built scalable RESTful APIs and integrated Mapbox for geolocation services and Cloudinary for image upload and management.
- Implemented security best practices, including input validation, session management, and authorization middleware, following MVC architecture.

Dog Disease Prediction using Machine Learning
Tech Stack: React.js, Python, Random Forest

- Developed a responsive React.js frontend for a dog disease prediction system, providing an intuitive interface for users to input symptoms and view predictions.
- Integrated a Random Forest machine learning model to predict diseases based on user inputs and display the results on the frontend.
- Received Copyright Registration for the project, recognizing its originality and innovation.

SKILLS

- Languages: C, C++, JavaScript, Python, Java
- Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
- Databases: MongoDB, MySQL
- Tools: Git, GitHub, Postman, MongoDB Atlas, Vercel, Render, LINUX
- Core Subjects: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems, Operating Systems, Computer Networks, REST APIs, JWT Authentication
- Machine Learning & AI: Scikit-learn, Pandas, NumPy, NLP, Transformers, BERT, Hugging Face

CERTIFICATIONS & ACHIEVEMENTS

- The Web Developer Bootcamp 2025 -Colt Steele (Udemy)
- Solved 300+ Data Structures and Algorithms problems on LeetCode.
- Design Team, ACM Student Chapter.
